Technical Skills

- Significant programming experience in Python, Java, and JavaScript.
- Significant experience using Git for version control.
- Experience developing web applications with HTML, CSS, React, and Node.js.
- Experience developing and running test automation scripts using Selenium.
- Some experience using GitHub Actions for CI/CD.

Education

Bachelor of Applied Science (BASC) – Computer Engineering September 2018 - April 2023
Queen's University – Kingston, Ontario

- Completed a 16-month internship between my 3rd and 4th year.
- Cumulative GPA of 3.3 on a 4.0 scale.

Work Experience

IT Developer, Queen's University May 2023 - August 2023

- Collaborated with senior developers to solve technical problems.
- Worked on multiple projects concurrently with competing priorities and timelines.
- Created documentation describing my work for other developers.

Software Developer, Queen's Centre for Advanced Computing May 2021 - August 2022

- Completed a 16-month internship working both remotely and in person.
- Worked within a team to develop software applications to meet client requirements.
- Met with clients to discuss project progress and understand their expectations.
- Contributed to 5 projects ranging from 2 to 8 months in length.

Tech Support, Queen's IT Support Center September 2018 - January 2020

- Provided first line support to walk-in faculty and students facing issues with software resources.
- Communicated technical problems to users and senior staff clearly and concisely.
- Troubleshooted user's IT problems using prior knowledge and online resources.

Extracurricular Experience

Technical Project Lead, Engineering Software Development Team September 2019 - April 2020

- Lead a team of students to develop a textbook exchanging website.
- Organized meetings, kept the team on track, and communicated progress to management.

Web Developer, QGEM Design Team May 2019 - October 2019

- Used HTML and CSS to update the team's active website.
- Discussed website designs and requirements with team leaders and implemented them.
